

— Digitize. Manage. Deliver. —

A Unified Platform for Grocery & Pharmacy Businesses

VendorFlow is a full-stack SaaS platform that helps local grocery stores and pharmacies digitize their business operations. Instead of every business building its own website or application, they join VendorFlow to manage inventory, receive online orders, coordinate deliveries, and analyze sales. Customers can discover nearby stores, upload prescriptions (for pharmacy products), place orders, and track deliveries through a single platform.

VendorFlow

Digitize. Manage. Deliver.

02

Why VendorFlow?

Empowering local businesses to move from traditional operations to a connected digital ecosystem.

The Current Challenge

Many local grocery stores and pharmacies still rely on **phone calls**, **WhatsApp**, **spreadsheets**, and **paper records**.

Managing **inventory**, **orders**, and **deliveries** manually becomes difficult as the business grows.

Building a dedicated website or application can be **expensive** and **technically challenging** for small businesses.

Most small businesses lack an integrated **delivery and order-tracking infrastructure**.

Our Motivation

To create one affordable platform where local businesses can manage their operations, reach more customers, accept online orders, and coordinate deliveries efficiently.

VendorFlow aims to bridge the gap between local businesses and digital commerce.

Problem Statement

Bridging the Gap Between Local Vendors & Customers

USEFUL FOR LOCAL VENDORS

- ✓ Save Time
- ✓ Increase Sales
- ✓ Manage Everything
- ✓ Grow with Insights

BENEFITS FOR CUSTOMERS
